

New York Society for Gastrointestinal Endoscopy

The Spring Course: Best of DDW 2021

Saturday, June 5, 2021

8:00 am – 3:15 pm

Virtual Event

Montefiore

The Spring Course: Best of DDW 2021 is jointly provided by the Albert Einstein College of Medicine – Montefiore Medical Center and the New York Society for Gastrointestinal Endoscopy

Course Description

The Spring Course is devoted to a review of the most compelling topics discussed during Digestive Disease Week® 2021. Faculty will present critically important information on new drugs, the etiology and pathophysiology of disease states, the epidemiology of diseases, the medical, surgical and endoscopic treatment of disease, and the social impact of disease states pertaining to gastroenterology, endoscopy, and liver disease.

The program includes a video forum of new endoscopic techniques as well as a summary of the major topics presented at the most important academic forum in gastroenterology, making for an invaluable educational experience for those who were unable to attend Digestive Disease Week® and an excellent summary review for all others.

Learning Objectives

- Discuss the spectrum of gastrointestinal diseases such as motility disorders and colorectal cancer and outline the enhancement and effectiveness of related treatment options such as the use of artificial intelligence in the detection and resection of polyps during colonoscopy
- Evaluate advances in the methods of assessing disease status in patients with inflammatory bowel disease and discuss the application of these techniques to patient treatment
- Discuss the efficacy and safety of treatments for portal hypertension, nonalcoholic steatohepatitis (NASH), and other chronic liver disorders
- Identify appropriate methods to detect and treat common disorders of the small bowel and colon, such as colon polyps, as well as endobariatric therapy for obesity and review the effectiveness of these approaches
- Examine the diagnostic and expanded therapeutic capabilities of ERCP and EUS to detect and treat disorders of the hepatobiliary tract, pancreas, and luminal gastrointestinal tract and to detect and manage suspected small bowel bleeding

Intended Audience

Practicing gastroenterologists, gastrointestinal endoscopists and surgeons, GI fellows, and GI nurses and associates
